

## Just the Facts.

Is EVERYONE on the same page with basic hazard information in your facility? **Sign Book™** gives people full access to such key data as safety protocols, phone lists, facility guides, regulations. Keep the binders on the shelf, but take out what's really important and put it in the faces of those who really need to see it. **Sign Book™** is removed from the wall in a second to be taken where it's needed, which is ideal for emergency response information. Graphic pages slip in and out as desired.
